

Fife Water Services PO Box 968 Chesterfield, MO 63006

For emergency assistance, call ChemTrec 800-424-9300

# SAFETY DATA SHEET

# FIFE BOS-101

# SECTION 1: PRODUCT IDENTIFICATION

PRODUCT NAME: **FIFE BOS-101** CHEMICAL DESCRIPTION: Catalyzed sodium bisulfite solution PRODUCT CLASS: Boiler Water DATE: 12-15-2015

# **SECTION 2: INFORMATION ON INGREDIENTS**

Chemical Name	CAS #	Weight %	OSHA PEL	ACGIH TLV
Sodium bisulfite	7631-90-5	48-50	TWA: 5 mg/m <sup>3</sup>	TWA: 5 mg/m <sup>3</sup>

# SECTION 3: HAZARDS IDENTIFICATION

WARNING!

May cause eye, skin and respiratory tract irritation.

Ingestion is hazardous to health.

May cause severe allergic reaction in some asthmatics and sulfite sensitive individuals. Product is corrosive to mild steel and aluminum.

PRIMARY ROUTES OF ENTRY: Eye contact, skin contact, ingestion, and inhalation of product vapor or mist

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Some individuals are said to be dangerously sensitive to minute amounts of sulfites in foods. Symptoms may include bronchoconstriction, shock, gastrointestinal disturbances, swelling, flushing, and tingling sensations.

# POTENTIAL HEALTH EFFECTS:

EYE CONTACT: Contact may cause eye irritation.

SKIN CONTACT: Contact may cause skin irritation.

INGESTION: If ingested, this product may cause gastric irritation due to the liberation of sulfurous acid. Very large doses may cause violent colic and diarrhea, bone marrow effects, circulatory disturbances and central nervous system depression. Ingestion may cause severe allergic reactions in some asthmatics and sulfite sensitive people. The allergic reaction may be characterized by nausea, diarrhea, itching, swelling, hives, acute asthma attack (possibly life-threatening), loss of consciousness or anaphylactic shock.

INHALATION: Vapors or mist of this product may cause respiratory tract irritation. Sulfite-sensitive individuals, upon inhalation of this product, may experience an allergic reaction similar to that described under INGESTION. The product may also give off sulfur dioxide gas upon heating or during reaction.

SUBCHRONIC, CHRONIC: No adverse health effects are expected to result from subchronic or chronic exposure to the product in the industrial workplace.

CARCINOGENICITY: NTP: No ingredients listed in this section IARC: No ingredients listed in this section OSHA: No ingredients listed in this section

# SECTION 4: FIRST AID MEASURES

EYE CONTACT: Immediately flush eyes with plenty of water for at least 15 minutes, lifting upper and lower eyelids occasionally to ensure complete rinsing. Get medical attention.

SKIN CONTACT: Flush skin with thoroughly with plenty of water. Remove contaminated clothing. Get medical attention if irritation persists. Wash clothing before reuse.

INGESTION: If swallowed, do NOT induce vomiting. If victim is conscious and alert, rinse out mouth with water and give 2 glasses of water to drink. Never give anything by mouth to an unconscious person. Get medical attention.

INHALATION: If inhaled, remove victim to fresh air. If breathing stops, give artificial respiration. If breathing is difficult, have a trained medical person give oxygen. Get medical attention.

#### SECTION 5: FIRE-FIGHTING MEASURES

FLASHPOINT: Not applicable

This product is not by definition a "flammable liquid" or a "combustible liquid".

LOWER FLAMMABLE LIMIT: Not applicable

UPPER FLAMMABLE LIMIT: Not applicable

AUTO-IGNITION TEMPERATURE: Not applicable

EXTINGUISHING MEDIA: Use water, foam, dry chemical, or carbon dioxide as appropriate to fight surrounding fires.

FIRE-FIGHTING INSTRUCTIONS: Exercise caution when fighting any chemical fire. A self-contained breathing apparatus and protective clothing are essential.

FIRE & EXPLOSION HAZARDS: Burning produces extremely toxic and corrosive sulfur dioxide gas.

DECOMPOSITION PRODUCTS: Sulfur dioxide, disodium oxide, and sodium sulfide.

NFPA RATINGS: Health = 2 Flammability = 0 Reactivity = 0 Special Hazard = None

Hazard rating scale: 0=Minimal; 1=Slight; 2=Moderate; 3=Serious; 4=Severe

# SECTION 6: ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED: Only trained personnel equipped with a NIOSH/MSHA approved, full face piece combination dust/mist & acid gas respirator should be permitted in the area of the spill. Dike area to contain spill in order to prevent contamination of sewage system or waterway. Reclaim as much material as possible. Dilute remaining material with a large quantity of water, and then neutralize with soda ash. Ventilate area well, since sulfur dioxide and carbon dioxide may be released during neutralization. Dispose of neutralized material according to federal, state, and local regulations.

U.S. Regulations (CERCLA) require the reporting of spills and releases to soil, water, and air in excess of reportable quantities. The toll free number for the U.S. Coast Guard National Response Center is 800-424-8802.

#### SECTION 7: HANDLING AND STORAGE

#### HANDLING:

Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Use with adequate ventilation. Wash thoroughly after handling. Do not take internally. Keep containers closed when not in use. Ensure that containers are properly labeled. Since empty containers retain product residues (vapors, liquid), observe all warnings and precautions listed for the product. Have emergency equipment (for fires, spills, leaks, etc.) readily available

STORAGE:

Store product in a cool, dry, well-ventilated area away from incompatibles. Prolonged storage of drums containing bisulfites may result in the evolution of sulfur dioxide. Open containers in areas with adequate ventilation only.

# SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

EYE/FACE PROTECTION: Chemical splash goggles

SKIN PROTECTION: Chemical resistant gloves and clean body covering clothing

RESPIRATORY PROTECTION: If airborne concentrations exceed published exposure limits, use a NIOSH approved respirator in accordance with OSHA respiratory protection requirements (29 CFR 191 0.134).

ENGINEERING CONTROLS: A system of local and/or general exhaust is recommended to keep employee exposures below irritating levels or airborne exposure limits, whichever is lower. Local exhaust ventilation if preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the latest edition of the ACGIH document *Industrial Ventilation, A Manual of Recommended Practices* for details.

WORK PRACTICES: An eye wash station and safety shower should be accessible in the immediate area of use.

#### SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

pH: 3.0-5.0

SPECIFIC GRAVITY: 1.35 g/mL

SOLUBILITY IN WATER: Complete

BOILING POINT: Not available

FREEZING POINT: 16 °F (-8.9 °C)

VAPOR PRESSURE (REID): Not available

VAPOR DENSITY: (air=1): Not available

APPEARANCE AND ODOR: Clear, pink liquid with an odor of sulfur dioxide.

#### SECTION 10: STABILITY AND REACTIVITY

CHEMICAL STABILITY: Stable

HAZARDOUS POLYMERIZATION: Will not occur

CONDITIONS TO AVOID: Avoid overheating. Temperature at or near 102 °C (216 °F) causes the evolution of toxic and corrosive sulfur dioxide gas.

INCOMPATIBILITY: Oxidizers, acids, steel, aluminum. Oxidizers may react with sodium bisulfite in strongly exothermic manner. Acids react with sodium bisulfite to produce toxic and corrosive sulfur dioxide gas.

DECOMPOSITION PRODUCTS: Sulfur dioxide, disodium oxide, and sodium sulfide.

#### SECTION 11: TOXICOLOGICAL INFORMATION

#### ON PRODUCT:

Toxicological data on chronic effects: Little information is available about the health significance of low-level chronic sulfite exposure (including production within the body), but sulfite and bisulfite react irreversibly through free radical formation and otherwise with various substances in the body including DNA. Sodium sulfite has been demonstrated to be mutagenic in microbial systems; however, it is not mutagenic in studies involving insects and is not considered to present a mutagenic threat to humans.

#### ON INGREDIENTS:

Test Material	Oral LD50 (rat)	Dermal LD50 (rabbit)	Inhalation LC50 (rat)
Sodium bisulfite	2,000 mg/Kg	Not available	Not available

#### SECTION 12: ECOLOGICAL INFORMATION

#### ON PRODUCT:

Test Material	Aquatic Toxicity Data	
Product	48 hr LC50 (Daphnia magna): 648 mg/L	
	96 hr LC50 (Fathead minnow): 648 mg/L	

#### SECTION 13: DISPOSAL

RCRA STATUS: Discarded product as sold would be considered a RCRA Hazardous Waste based on the characteristic of corrosivity because the product corrodes steel at a rate >0.250 inch/year at 130 °F. The EPA Hazardous Waste Number is D002.

DISPOSAL: Dispose of in accordance with local, state, and federal regulations.

#### SECTION 14: TRANSPORTATION

DOT CLASSIFICATION: UN Number: UN 2693 Proper Shipping Name: Bisulfites, aqueous solutions, n.o.s. (contains sodium bisulfite) Primary Hazard Class/Division: 8 Packing Group: III Label: Corrosive

#### SECTION 15: REGULATORY INFORMATION

OSHA Hazard Communication Status: Hazardous

TSCA: The ingredients of this product are listed on the Toxic Substances Control Act (TSCA) Chemical Substances Inventory.

CERCLA: EPA Hazardous Substances (40 CFR 302): <u>Chemical Name</u> Sodium bisulfite Product (Notify the EPA of spills exceeding this amount.)

#### SARA TITLE III (Sections 302, 311, 312, and 313):

Section 302 Extremely Hazardous Substances (40 CFR 355): <u>Chemical Name</u> <u>CAS#</u> <u>RQ</u> <u>TPQ</u> None

Section 311 and 312 Health and Physical Hazards:								
Immediate	Delayed	Fire	Pressure	<b>Reactivity</b>				
yes	no	no	no	no				
Section 313 Toxic Chemicals (40 CFR 372): <u>Chemical Name</u> None <u>CAS Number</u> <u>Percent by Weight</u>								
SECTION 16: OTHER INFORMATION								
HMIS RATING	S: Health :	= 2 Flamma	ability = 0 Re	eactivity = 0				

Hazard Rating Scale: 0=Minimal; 1=Slight; 2=Moderate; 3=Serious; 4=Severe

While this information and recommendations set forth herein are believed to be accurate as of the date thereof, FIFE WATER SERVICE LLC MAKES NO WARRANTY WITH RESPECT HERETO AND DISCLAIMS ALL LIABILITY FROM RELIANCE THEREON.
